

Proyeksi-baca (sinkron trigger). Kolom data penugasan & penyelesaian pada reports (assigned_agency_*, assigned_distance_meters, routing_method, resolution_*, resolved_*) adalah salinan baca yang disinkronkan trigger dari report_assignments & report_evidence, agar klien Realtime cukup membaca satu tabel.

FK audit ke profiles: verified_by, resolved_by (reports), updated_by (report_history), uploaded_by (report_evidence), assigned_by (report_assignments). Rincian enum & RLS: Lampiran D.

Notasi	Arti
*	wajib (NOT NULL)
PK / FK	kunci primer / asing
crow's foot	relasi satu-ke-banyak
