Pemakaian oleh aplikasi
 Aplikasi hanya merujuk secara logis ke **objects** dan **buckets** (disorot biru): berkas disimpan sebagai pasangan bucket + object_path pada bucket privat, lalu diakses melalui signed URL. Tabel berwarna abu (multipart, vector, analytics, migrations) dikelola internal oleh Supabase Storage dan tidak dipakai.

Notasi	Arti
*	kunci primer
PK / FK	kunci primer / asing
biru	tabel yang dipakai aplikasi
abu	tabel internal Supabase
